Data: Global Carbon Project (National Fossil Carbon Emissions 2024 v1.0), World Bank Population Data and World Bank GDP (current US\$).						
Interpretation: GDP change is nominal and provides current-price context only; it is not real GDP growth or evidence of causation.						
Change encoding: Orange ▲ indicates an increase and blue ▼ indicates a decrease. Colour communicates direction, not desirability.						
Dotted Lines Marked years: 1991 (Soviet collapse), 2008 (global financial crisis), 2020 (COVID-19).
